ABOUT ME

I received a degree in computational linguistics, but have decided to pursue a career in IT instead. My first job was an internship and then a full-time position as a QA engineer, and I still am very passionate about testing. However, I have found that creating user interfaces is what really brings me joy, and I currently work as a frontend developer with experience primarily with React and Typescript.

PROGRAMMING SKILLS

Languages

Javascript / Typescript, Python (pytest, Flask), Go (basic)

Frontend

React, Redux, HTML & CSS, PostCSS, Jest, Sentry

Technologies

Git (github flow), Gitlab CI, SQL, Docker

WORK EXPERIENCE

2021-present
